Ivanti:
Point Mobile's PM85 and PM90 Now Velocity Ready

Velocity, powered by Wavelink, is one of the industry-leading solutions to securely deploy Android mobile devices in retail and supply chain operations. Velocity's user interface was designed from ground up to take advantage of modern touchscreen devices to optimize your enterprise systems. It makes it easy to migrate your existing telnet and browser-based applications.

Our rugged mobile computers PM85 and PM90 are now Velocity Ready, fully supporting the entire feature set of Velocity. Both devices run host and web-based applications without making any changes to your WMS, ERP or other enterprise applications.
With Velocity and our mobile devices, your enterprise systems are secured for years to come helping you saving millions of dollars in development. Furthermore, Point Mobile extends the life cycle of PM85 and PM90 to seven years after product launch while supplying security patches and updates to newer Android versions, enabling customers to use the latest platform on their enterprise devices.

Furthermore, both devices are part of *Android Enterprise Recommended*, a Google-led program that helps enterprises select and deploy the right mobile devices for their needs.

PM85
A 5in screen packed in a stylish yet rugged (IP67, 1.8m drop spec) housing, sporting a 1.8GHz processor and 3GB RAM/32GB ROM. If equipped with LTE, two SIM slots are available. PM85 has two Honeywell Slim Imager options for all everyday scanning tasks. Two battery options available.

PM90
Latest technology for all enterprise needs: 2.2GHz, 4GB RAM/64GB ROM out of the box and a bright 5in screen. It is IP67 certified and drop protected up to 1.5m. PM90 can be equipped with LTE, Honeywell Imager, magnet and IC card reader and much more. Two battery options.
