Product Launch Announcement PM67

1. INTRODUCTION OF PM67

PM66+1

PM67 is a rugged Android mobile computer with a full numeric keypad that shares its form factor with PM66, the predecessor and inspiration. PM66 has proven its power and versatility around many applications and we upgraded the internals and improved performance, while leaving the outside intact.

Keeping the good things

In many industrial applications, users prefer physical keys instead of a touch-based virtual keypad on screen when they need an absolutely accurate data input. The full numeric keypad comes in even more handy when working with gloves or outside in bad weather. Each key on PM67 is wide and big enough for solid and fast typing. LED backlit keypad makes working easy even in dimly lit areas. As well as the keypad, the dimension and the shape of the device remains the same as its predecessor, making PM67 backward compatible with nearly all accessories of PM66 and keeping the cost per device on a low.

PM66

- Android 6
- 1.2GHz Quad-core
- 2GB/16GB Memory
- Micro USB Type B
- Standard SIM

PM67

- Android 11
- 2.0GHz Octa-core
- 3GB/32GB Memory
- USB Type C
- Micro SIM

More power for advanced solutions

Despite the same external design, almost all performance aspects have gone through an upgrade. PM67 runs Android 11 OS, offering better security and more convenient yet intuitive interface. 2.0GHz Qualcomm Octa-core processor and 3GB RAM / 32GB ROM run even power-intensive business solutions smoothly. Bluetooth 5.1 with BLE support helps PM67 connect to multiple devices instantly and reliably, and Wi-Fi data transfer is about three times faster than PM66 (maximum speed comparison). LTE model is still optionally available.

Product Launch Announcement PM67

2. TECHNICAL FEATURES

- Qualcomm® Octa-core @2.0GHz (1.8GHz optional)
- Android 11 (upgradable to newer version)
- CTS & GMS certified, Android Enterprise Recommended (pending)
- Micro-SD slot (up to 512GB), 1 Micro-SIM card slot
- 3GB RAM / 32GB ROM (opt. 4GB / 64GB, MOQ)
- Physical numeric keypad (24 keys) with backlight
- IP67 and 1.5m (5ft) drop resistance to steel
- Operating temperature -20°C to 60°C / -4°F to 140°F
- 300g / 10.58oz
- Wi-Fi and optional LTE
- NFC (Near Field Communication, optional)
- Bluetooth 5.1, BLE support
- Honeywell N3601 1D/2D LED scan engine as standard (optional N6603 laser engine, MOQ)
- 4,200mAh Li-ion replaceable battery
- Built-in speaker
- USB type C and pogo pin
- 8MP rear camera with LED flash

(Pending)

Product Launch Announcement

PM67

▲ Full numeric keypad

The full numeric keypad comes in handy when working with gloves or outside in bad weather, as you can feel the buttons without looking. Each key on PM67 is wide and big enough for solid and fast typing. LED back-lit keypad makes working easy even in dimly lit areas.

Certified devices that meet Google's strict enterprise requirements
(Pending)

▲ Android 11

The latest Android OS offers the best user interface and one of the highest levels of security in any mobile device. Compared to legacy Android of PM66, Android 11 offers more efficient battery management, multiple Bluetooth connections, and faster and smoother touch interface.

PM67 is GMS (Google Mobile Services) certified to support all official APIs and will be listed in Android Enterprise Recommended products.

Product Launch Announcement

PM67

▲ Wi-Fi 6 ready: speed without congestion

PM67 is among the first devices in our lineup supporting Wi-Fi 6 ready, the next generation Wi-Fi with incredible data transfer speed. The technology is still relatively hard to find in the enterprise mobility industry, but as the amount of data flow and the number of smart devices increase across industries, fast yet reliable connection is getting more important than ever. Wi-Fi 6 ready connects multiple devices without speed loss and is more secure compared to the previous generation of Wi-Fi.

▲ Backward compatibility

By keeping the form factor for which PM66 has been praised, we made almost all the existing PM66's accessories compatible with PM67, including Single Slot Cradle, 4 Slot Cradle, Battery Charger, Gun Handle, etc. USB port is upgraded to type C, but the cable comes in the box as standard accessory.

4. AVAILABLE SKU FROM LAUNCH

LTE and NFC are provided as options, while Wi-Fi, Qualcomm 2.0GHz processor, and full numeric keypad come as standard across all models.

Assy SKU	Item number	LTE	NFC	N3601 LED engine	N6603 laser engine	4GB RAM / 64GB ROM
SKU1	PM67GPV23BJE0C			○		
	PM67GPV23BJK0C					
SKU2	PM67G6V23BJE0C	○	○	○		
	PM67G6V23BJK0C					
SKU3* (MOQ)	PM67G6Q23DJE0C	○	○		○	○

- Not all SKUs are available in every region. Please contact your regional sales representative for more information.
- Models with 1.8GHz processor: more information upon request.

5. FUTURE SKU ADDITION

The current list of SKUs is complete and covers a variety of applications and demands. However, there may be future additions to the SKU list above. Point Mobile will publish an updated version of Product Launch Announcement (PLA) in case new configurations are added to the configuration list.

PM67

10. Enterprise Mobility Kit (EmKit™)

The Enterprise Mobility Kit (EmKit™) is Point Mobile's value-added service kit engineered for the pure benefit of system integrators. EmKit™ supports the utilization, solution development, and secure management of your business devices as shown in the chart below. It is pre-installed on PM67 and free of charge.

Development Tools

SDK for Android		Take full advantage of Point Mobile devices' capabilities by effortless development with SDK.
Ivanti Velocity		With Velocity powered by Wavelink, you can easily migrate and modernize existing applications at a pace you control.

Management Tools

Direct Clone		Master PDA will function as a local server for nearby devices to automatically communicate and "clone" the settings of Master PDA without any network connection.
Scan2Set		Setting up the device is not painful anymore. You can download the secure backup file and setup the device with a single scan of QR code.
Scan2Stage		Scan2Stage is a solution that enables Point Mobile devices to stage easily, no matter how many devices you have to prepare for productive use.
EmKiosk		Makes it easy to create single-purpose devices. You can improve workforce productivity and control user's access boundaries – Only authorized applications are visible.
EmSync		Experience central management system. EmSync lets the manager monitor the status of deployed devices and sends a JSON file made by Scan2Stage for optimizing the devices with up-to-date configurations.
EMM (AirWatch, MobiControl, TeamViewer)		EMM increases efficiency by assisting enterprise in monitoring and managing devices remotely.

PM67

Productivity Tools

MultiScan		Increase efficiency by capturing multiple barcodes at once
Power Extended Wedge		Power Extended Wedge enables selective modification of decoded value. Save your resources for efficiency by capturing and sorting out only what you need.
TouchScan		Place the virtual scan button on the screen wherever you want and tap the button to scan a barcode instead of a physical button.
EmHealthReport		Keep your device's battery healthy and improve the performance of the device with EmHealthReport which helps you monitor and record the battery status to manage the battery's life cycle.
Program Buttons		Improve convenience by mapping frequently used functions to easily reachable hardware buttons.

Business Tools

PTT (Zello, Initial T, Cybertelbridge)	Connect all workers at the same time! PTT Solutions give you a truly unified enterprise device.

PM67

11. FREQUENTLY ASKED QUESTIONS

Can I upgrade PM67's storage by myself?

Yes, PM67 supports Micro-SD cards of up to 512GB and you can upgrade easily by yourself. The SD card slot is located under the battery.

What does backward compatibility mean exactly?

It means that you can use all PM66 accessories with PM67 as well, with one exception of micro USB Type B Cable. Also, the RS232 function on PM66's Single Slot Cradle (opt. Ethernet) does not work with PM67.

Are physical function keys programmable?

Yes, you can designate the four function keys for specific use in EmKit™, which is free of charge and pre-installed.

Will my applications from PM66 (Android 6) still run on PM67?

Yes, all new Android OS is developed in a way that preserves compatibility with applications in earlier versions. If your business has been deploying PM66, you should be able to migrate all the applications to PM67 without any disruption in the workflow.

For more information about how this works, visit the link below:

<https://developer.android.com/guide/topics/manifest/uses-sdk-element#ApiLevels>

What is Android Enterprise Recommended (AER)?

Android Enterprise Recommended (AER) is a Google-led program involving device makers that helps businesses use the best Android devices and services suited for their needs. AER gives customers confidence by curating a selection of devices and services, making deployments of Android more consistent, and helping ensure their development is current and up to date.
