

PM95

LEAD THE FUTURE OF ENTERPRISE MOBILITY: DISCOVER THE 5G DEVICE THAT MEETS ALL YOUR NEEDS

copyright © 2024 Point Mobile Co., Ltd. All rights reserved.

At-a-glance

Qualcomm 2.4 GHz

Android 13 (Upgradeable to 18)

Gorilla Glass

Enterprise Hot-Swap

16 MP Rear (PDAF)
5 MP Front

Physical PTT & Emergency Button

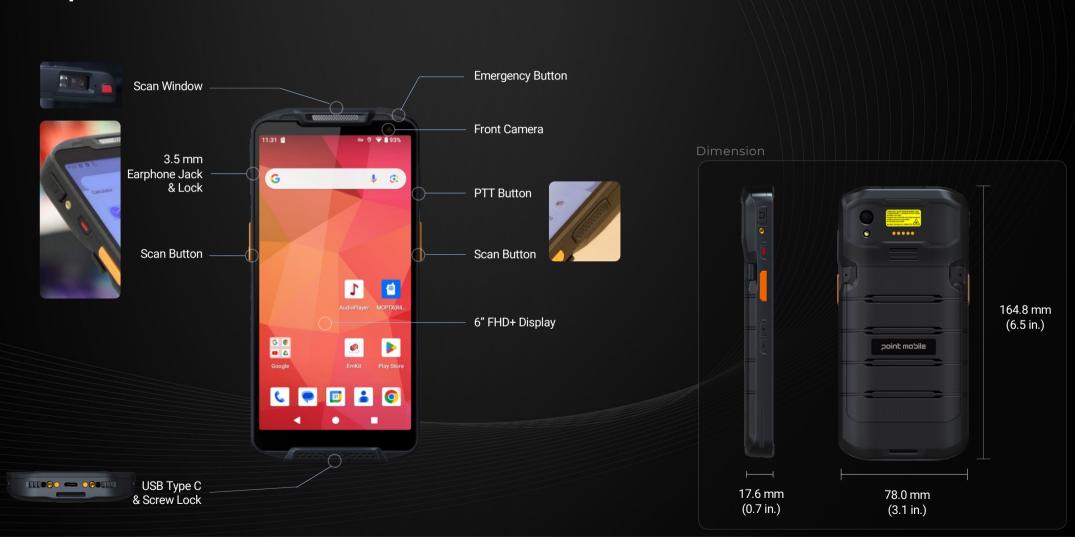

1.8 m (6 ft.) w/ Rugged Boot

IP68 and IP65

Specifications

POINTMobile

Specifications

Processor & Storage

Qualcomm Octa-core 2.4 GHz 6 / 64 GB (UFS) 8 / 128 GB (UFS)

Android

Android 13 (upgradable to 18)
GMS & AOSP
FOTA (Firmware Over The Air)
Android Enterprise Recommended

Network

WLAN: Wi-Fi 6E, 2x2 MU-MIMO WWAN: 5G, 4G BT Class 1 (opt. Class 2)/ Ver. 5.2 / BLE support BLE Beacon (up to 30 days, power-off)

Display

6" FHD+ (1080 x 2160 px)

Daylight Readable (500 nits, typical)

Multi-touch Capacitive

Corning Gorilla Glass

Data Capture

Supporting 1D/2D barcode symbologies

Camera

16 MP Rear, PDAF, Flash 5 MP Front

Audio

3 microphones (noise-canceling) 2 speakers (3W 100 ±3 dB, SmartPA) Receiver

Ruggedness

IP68 and IP65

1.8 m (6 ft.) with the Rugged Boot
1.5 m (5 ft.) without,
multiple drops to the concrete
floor (operating temp.)
MIL-STD-810H

Sensors

Proximity sensor Light ambient sensor Accelerometer Gyro sensor / Digital compass Barometer / SAR sensor

Battery

Standard battery: 4,950 mAh Extended battery: 7,020 mAh

Dimensions

78.0 x 164.8 x 17.6 mm (3.1 x 6.5 x 0.7 in.)

User Environment

Operating temperature $-20~^{\circ}\text{C}$ to $60~^{\circ}\text{C}$ (- $4~^{\circ}\text{F}$ to $140~^{\circ}\text{F}$) Storage temperature $-25~^{\circ}\text{C}$ to $70~^{\circ}\text{C}$ (- $13~^{\circ}\text{F}$ to $158~^{\circ}\text{F}$)

Advanced network performance

5G: Stay connected with lightning speed

The 5G ensures a significant upgrade in data transmission, opening up your business for new opportunities. Now faster than ever, you can send high-resolution video files or even AR contents instantly.

Wi-Fi 6E: The most advanced

Wi-Fi 6E uses a new bandwidth of **6 GHz**, expanding network capacity, reducing bottlenecks, and making everything faster. It helps businesses to adopt more IoT devices or make use of virtual reality thanks to its large capacity. While the network gets faster, the **battery consumption stays more efficient** than older generations of Wi-Fi.

A future-defining premium device

High-end look meets functionality

Sleek and stylish, as good as consumer phones: With a thoughtful and detailed design process, PM95 delivers a high-end look, without disregarding practical functionality businesses value.

The big **6" FHD+ screen** shows lots of information clearly and

The big **6**" **FHD+ screen** shows lots of information clearly and merges well into the overall premium design.

The ergonomic build-carefully designed and thoroughly tested-provides a **comfortable grip and reduces slip risk**.

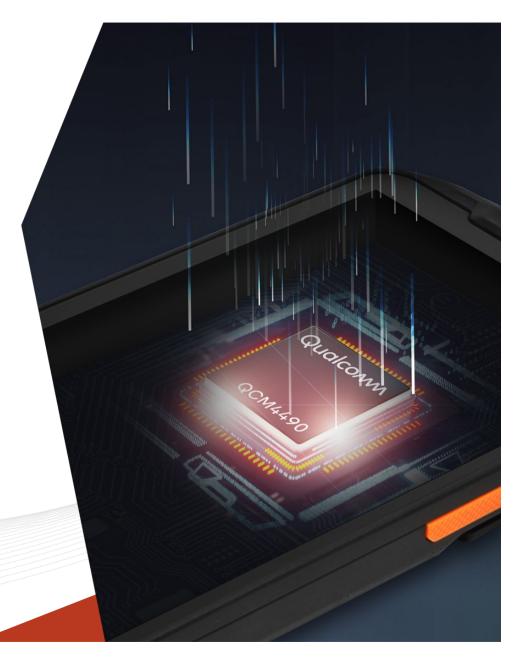

Supercharged performance for a pro

Pro-level features

PM95 features an **octa-core 2.4 GHz** processor, which, when combined with the optional **8 GB RAM** and **128 GB UFS storage**, ensures a smooth user experience that maximizes productivity. The device's optimized processing power also enhances both the data capture capabilities of its integrated 1D/2D scan engine and the performance of the **16 MP rear camera**, which includes Phase Detection Autofocus for quick, sharp images. The excellent ruggedness of **1.8 m drop resistance to concrete** (with the Rugged Boot) makes the PM95 an ideal choice for professionals who demand the utmost durability from their equipment.

BLE Beacon at its finest

PM95's advanced BLE Beacon is capable of transmitting location signals for **up to 30 days** even when the main battery is detached, significantly decreasing the chances of losing valuable devices and simplifying asset management.

Extra power for wider application

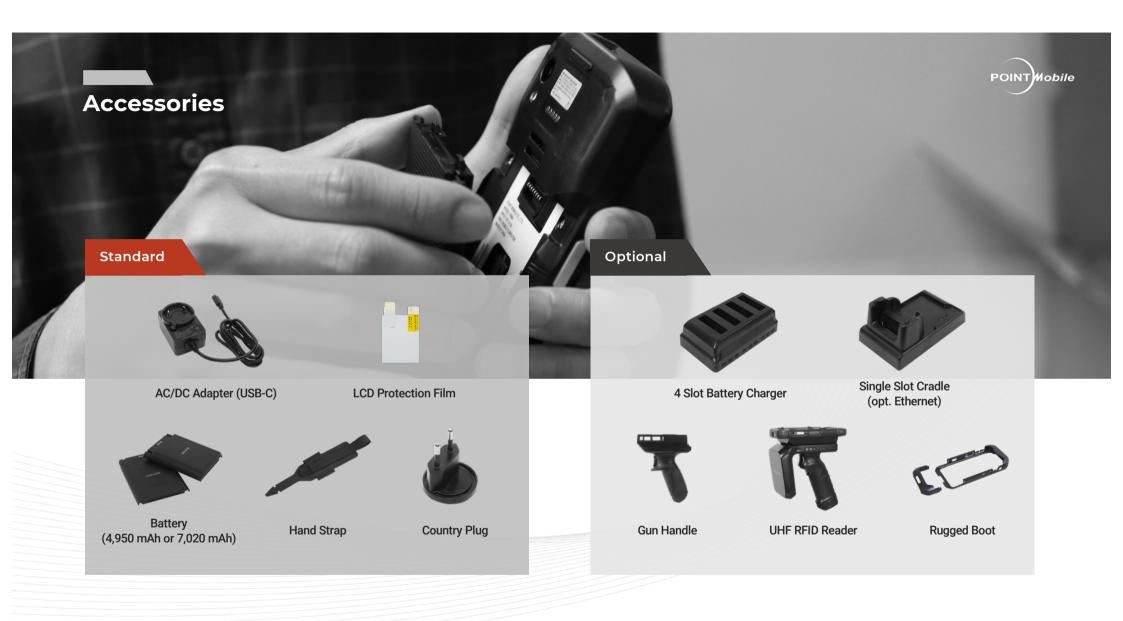

PTT & MCPTT

PM95 features a dedicated physical button for Push-To-Talk (PTT) on the right side, facilitating instant team communication. Additionally, an Emergency Button on the top of the device **complies with Mission-Critical Push-to-Talk (MCPTT) standards**, catering to specialized and critical applications. The device is equipped with three noise-canceling microphones and powerful dual speakers (3W, 100 ±3 dB with SmartPA), ensuring clear PTT communication even in the noisiest environments that workers typically encounter.

Payment

For added versatility, the PM95 offers an integrated **IC/MSR** module as an option for a physical payment solution as well as contactless payment via NFC. It comes with EMV contact & contactless L1 certifications and supports Master, VISA, and more.

The Enterprise Mobility Kit (EmKit™) is Point Mobile's value-added service kit engineered for the pure benefit of system integrators. Experience software services as intelligent as the ruggedness of our industrial handhelds-fully compatible with all our Android GMS certified devices.

<Main features>

Direct Clone

Solution for restoring the devices to the same settings with no internet connection. With Direct Clone, a Master PDA becomes a hotspot server and sends its backup file to nearby client devices to clone the settings.

Scan2Stage

PC tool for provisioning Point Mobile Android devices. With Scan2Stage, IT administrator can prepare the settings of the device and make QR code for Scan2Set.

Android solution

PULS

Patches, Updates & Lifetime Support

PULS is Point Mobile's lifetime solution, which extends the life cycle of Android-based Point Mobile enterprise devices up to seven years after a product launch.

Up to 5 years from the initial launch until the end of sales

Two additional years after the end of sales

Up to 7 years of updates & security patches

Stay up-to-date with the latest update for up to 7 years

Security patches are provided regularly

Conveniently update your devices in the field **by FOTA**

Make a Profile Easily as You Want Check Device Status At a Glance Easy Deployment

PMDM is a mobile device management solution for managing and monitoring your PM Android devices

Centralized management of enterprise devices is vital for better productivity. You should provide a device configuration so that the workers can concentrate on their work with the device, and also decrease the device downtime by predicting when to replace the battery, etc.

PMDM brings to life the centralized management desired by IT administrators through its array of management features.
